International Showcase of Art Professionals

Since i was 5 years old I was interested in drawing and painting. I have won many awards in drawing competition. This has encouraged me to great heights also I have received great support from my parents. I have been reading children books and magazines , also I have a great collection of children story books.. In school too i could easily draw illustrations on any stories my teachers used to read. I have been given various assignments in school from teachers for illustrating their poems and make charts for the classroom and do diagrams. I love to illustrate. My aim is to become a very good illustrator when I grow up and gain fame in my country as well as abroad. I am planning to study fine arts when I grow up and then take up illustration as a full fledge career. At present I am working as an illustrator for various magazines like Stone Soup.

<http://storiesforchildrenmagazine.org/default.aspx>

Till now I have used plastic crayons and water color pencils and drawn by hand.

Soon I am planning to learn adobe photoshop and corel draw this vacation so I can illustrate using computers. I will love to receive assignments from different children magazines and editors of kids books.

Thank yor for your time Aditi Please click on thumbnails to see larger view..
